

EASIER. FASTER. COMPLIANT.

CardiacCare is the leading software solution for participating in national databases like the American College of Cardiology, the Society of Thoracic Surgeons, and the American Heart Association registries.

Western Healthcare Alliance (WHA) partners with Cedaron to provide CardiacCare, making it easier for you to participate in cardiac registries while letting you know if your data is incomplete or does not meet the criteria.

Automate Data Collection and Validation

Import up to 100% of data from your EHR, CVIS hemodynamic, and EP systems. Cedaron takes this import a step further by automatically validating the incoming data against ACC rules.

Eliminate Duplicate Data Entry

CardiacCare is certified for interoperability between registries. It will automatically cross populate your data fields with the same data definition across registries.

Know When Data is Out of Range

CardiacCare validates data at the point of entry, automatically warning you whenever data is outside the permissible range for each ACC, STS, and AHA elements.

Analyze Data on Demand

CardiacCare includes Centro Analytics, which supports real-time analysis of registry data. The tools are easy to use, but capable of creating complex reports on complications, length of stay, door-to-balloon time, quality of care, and other variables.

Real-time Dashboards and Reports

- Easy to access flash reports.
- Intuitive reporting tools allow you to slice and dice your data.
- Schedule automatic emailed reports to physicians and administrators.

CardiacCare is Web-based for Flexibility

If you're concerned about the validity of your data, or simply need easier access to your data and faster reporting capabilities, Cedaron is here to help.

CardiacCare can even migrate your data (for FREE) from your prior system; whether it's housed with another vendor or on the ACC website.

Cedaron software comes with a full year of maintenance and service. When you renew support after the first year, you'll continue to receive these same great services:

- FREE 24/7 support.
- FREE software upgrades.
- FREE workflow customization.
- FREE development of custom flash reports.

Reach out today to learn how Cedaron uses CardiacCare to help you participate in cardiac registries with peace of mind.
