

Software to Improve Both Patient Care & Provider Processes

Easier. Faster. Compliant.

Registries, Rehabilitation & Analytics Software to Improve Both Patient Care & Provider Processes

We know you would rather spend more time providing care for your patients than documenting it. Finding cost-effective rehabilitation EMR software that is all encompassing can be overwhelming. Western Healthcare Alliance (WHA) partners with Cedaron to bring members a powerful solution that can help you increase departmental productivity, incur decreased denials, reduce staff overtime, and provide care to more patients.

CardiacCare+ Registry Software

Software That Will Reduce Your Heart Rate

Your specialty departments are fast-paced environments and your staff doesn't have the time to find critical data and then manually enter and re-enter in various registries. You need a tool that enables seamless data collection and also provides detailed analytics to help you benchmark your outcomes.

Cedaron's leading registry software solution, CardiacCare+ is here to help!

When your data is easy to find, validate, and view, you'll improve patient outcomes, have happier staff, and reduce the cost of care. With access to CENTO interventional analytics, health systems report quantifiable ROI in reduced readmissions, lower cost of care, higher provider satisfaction, and greater user efficiency.

Easier. Faster. Accurate.

Cedaron is Easier

- Automate and validate your data collection at the point of care.
- Eliminate duplicate data entry.
- Know when data is out of range.

Cedaron is Faster

- Automate PROMs surveys with DANZA Patient Engagement.
- Analyze data on demand.
- See updated dashboards in real time.
- See reports that are most useful to you.
- Explore your data on the fly.

Cedaron is Accurate

- No more back-end clean up. Know if a case is appropriate before you send it.
- Conduct internal audits.
- Eliminate risk created by manual data duplication.
- Never worry about bad data from iffy interfaces.

**Cedaron is certified for the most clinical registries out of any vendor.*

Save thousands of dollars while improving patient care & quality.

Enjoy customized therapy workflows for PT, OT, Hand, and Speech, and a seamless experience from intake to patient care and billing. Cedaron's rehab EMR is used in hospitals, private practices, and teaching clinics. It's endorsed by—and designed in partnership with—the APTA, AOTA, and ASHT.

Designed by therapists to get you moving in the right direction.

CONNECT by Cedaron will increase your revenue, maximize productivity, and calm the storm of compliance.

- CCI edits automatically calculated during charge capture
- Medicare Therapy "soft" Cap automatically calculated after each visit
- Plan of Care prevents billing of unauthorized procedures
- Telehealth integrated with scheduling, patient notification, and therapist workflows; tap to join, nothing to download

- ▶ **Reporting**
Your workflow automatically builds reports for you
- ▶ **Patient Dashboard**
Create what you see at a glance
- ▶ **Communication**
Automate custom reports for your physicians
- ▶ **Treatment & Goal Kits**
Built for the most common interventions
